

Atomwide can offer schools a web hosting platform that allocates each school 15GB of disk space, 2 MySQL databases and supports a range of different websites including ASP.Net and PHP5.

The web hosting environment is fully resilient and hosted across two data centres with all content backed-up on a nightly basis. Schools are given control over their hosting environment via a secure online management interface. Alternatively, sites can be managed via FTP.

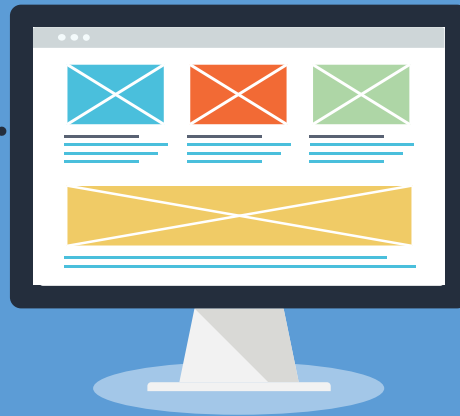

15GB disk space as standard

Backed up on a nightly basis

Fully-resilient web hosting
Service for schools

Fully supported

FTP site management
