

The myUSO website is a password-protected application launcher and bookmarking service accessible to all pupils and staff members in USO-enabled schools. By creating a publishable 'Home page' from which staff and pupils can easily access all USO authenticated services, plus any additional web-based services linked alongside, myUSO presents a simple, convenient and organised route to online resources for schools. myUSO also includes a host of useful cloud-based school services.

### Features

- ✓ Online application and bookmarking service
- ✓ Dedicated cloud storage to save and share files
- ✓ Secure data transfer service
- ✓ An online homework service
- ✓ Cloud-based Microsoft document creator and editor
- ✓ A noticeboard for school-wide announcements
- ✓ Shared school calendars
- ✓ Create, print or email letters in bulk

## Digital Launchpad

This service allows school staff to create and manage a set of links to online learning resources for their pupils. As a result, all resources needed by pupils during the school day can be grouped by class and accessible via a single login. Groups can contain links to USO-authenticated and non-USO resources, including services hosted within the school. Each user, staff or pupil also has the option to create lists of personal useful links which is accessible only to them. The site also contains a staff notice board where internal messages can be posted for colleagues to find in the course of the working day.

## Cloud-based school services

No longer just a digital launchpad, myUSO is also a gateway to a range of school-focused ICT solutions. Staff member, pupil or administrator alike can now benefit from services such as myDrive, a dedicated cloud-storage platform with in-built Microsoft Office Document creator and editor, myHomework, which puts the entire homework cycle online and USO-FX2, which allows for the secure transfer of data from one individual to another or group. For more information on each of the myUSO resources please see [www.atomwide.com/myuso.html](http://www.atomwide.com/myuso.html).

## Authentication

Users can log into myUSO in a variety of ways. Traditionally with their USO account details for staff and older pupils and a simplified login system for younger or SEND students. Users can now also log into myUSO using either their Google or Microsoft Office 365

## The Homepage

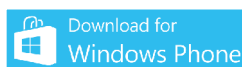

Schools are able to customise the look and contents of the myUSO homepage to create a customisable Welcome page for their school using their own logo and images. Alternatively, schools can integrate access to myUSO with their own website by adopting the myUSO top bar for easy access to myUSO whether at school or home.

## The myUSO mobile app

The myUSO mobile app puts key myUSO services and features in your pocket. Available for Android and iOS devices the app gives access to your stored myDrive files, your myHomework status and more.

## Training

Training on how to get the best out of myUSO is offered by Atomwide at our offices in Orpington. All training courses, including those on other Atomwide supplied or supported services are available to be booked in myUSO. New courses are published in the training tab as and when they are available to be booked.
